-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 26 January 2007.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-12 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-12 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-11 are rejected under 35 U.S.C. 102(e) as being anticipated by Young (U.S. Patent No. 6,567,011).

Regarding claims 1, 5, 9, and 10 Young teaches a plurality of keys closing switch contacts (reference numeral SXX in Figure 15B) corresponding thereto when pressed down; a microcomputer (reference numeral U1, U2 in Figure 15B, 15A, respectively) coupled to said keys for generating a remote-control signal in response to pressing each of said keys; and a transmission circuit (reference numeral IR1 in Figure 15A) coupled to said microcomputer for transmitting a remote-control signal, wherein the microcomputer is operable to: a) store for each of said keys respective indications of whether or not each respective switch contact is detected as having been closed responsive to respective depression of said keys (via ROM or RAM in U1 of Figure 15B and described in column 12 lines 65-67), said respective indications maintained in storage simultaneously (via ROM or RAM in U1 of Figure 15B and described in column 12 lines 65-67), transfer said indications after said indications have been stored and simultaneously maintained (e.g. blinking LED of column 9 lines 9-23).

Regarding claims 2, 4, 6, and 8, Young teaches that said transmission circuit transmits the signal as one of an infrared ray signal (via IR1 in Figure 15A) and a radio signal.

Regarding claims 3 and 7, Young teaches that the remote-control test signal additionally carries an identification signal of said microcomputer (e.g. "unique IR data output" of column 8 lines 52-65).

Regarding claim 11, Young teaches that transfer of said indications is delayed until after more than one of said indications of closing of said contacts has been stored (e.g. 0.5 second delays of column 9 lines 9-23; e.g. storing 4-4-3, the upon release of key "1" in column 9 lines 9-23).

3. Claim 12 is rejected under 35 U.S.C. 103(a) as being unpatentable over Young (U.S. Patent No. 6,567,011) in view of Duffield (U.S. Patent No. 5,451,953).

Regarding claim 12, the combination of Young and Davies differs from the claimed invention in that it fails to specifically teach that one of said keys is detected as not closed despite being depressed. However, as noted by Duffield, this feature is very common in typical keyboard scanning software (column 2 lines 42-57). One skilled in the art would have been motivated to include such a feature in the combined device of Young and Davies in order to avoid ambiguity between reading of keys pressed simultaneously. Furthermore, Young suggests the ability to test each of the keys during a factory test mode, thereby suggesting the ability to detect keys as not transitioned despite being depressed (column 8 lines 52-65). Therefore, it would have been obvious to one skilled in the art at the time the invention was made to include as a feature in the combination of Young and Davies the ability to detect one of said keys as not closed despite being depressed.

Response to Arguments

4. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection. As noted above, Young meets the broadened claim language of the amendment.

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Agustin Bello whose telephone number is (571) 272-3026. The examiner can normally be reached on M-F 8:30-6:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jason Chan can be reached on (571)272-3022. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
